

RAJSHAHI UNIVERSITY OF ENGINEERING AND TECHNOLOGY

Course Title: Web Based Application Lab/Project

Course Code: CSE-3100

Project Progress Report

Submitted To:

Tasmia Jannat

Lecturer ,

Department of Computer Science & Engineering,

Rajshahi University of Engineering and Technology

Submitted By:

Mohammad Sayed Hossain

Roll:1803025

Section: A

Department: Computer Science & Engineering

Rajshahi University of Engineering and Technology

Date: 18.07.2022

Learned:

1. Basics of HTML, CSS and PHP
2. How to create and connect database to website & insert data in database direct from user.
3. How to use session to keep logged in the user.

Project Progress: Developed student and admin panel of the website. Student can registration and logged in the website. Student can also see the books stored in the library. The admin can see the student's information.

Problem: Email verification of user ,admin & student panel joining ,and making order of book from user has not been implemented.

Next: Email verification,admin & student panel join,Making of order of book,Adding and deleting book by admin.

Date: 22.10.2022

Learning:

1. Email verification of user of the website.
2. How to give acces the webpage to different user.
3. How to edit the the database from the user end in real time.

Project Progress: Student now can see the available books, request and return the books. They can also see the fine if returned late. The admin can now grant or reject user request of book and also can add new books to database. Besides if a new admin register for admin other admin has to approve first.

Problem: Currently there is not any problem of the feature which has been implemented.

Next: Chat system between the admin and user can be implemented.
